Madhya Pradesh Government has made tremendous qualitative improvement in augmenting road infrastructure. A network of about 1.75 lakh kms state highways, national highways, and high quality roads has been constructed connecting every district.
With the combined production of 28,000 MW power from conventional thermal, Hydro and renewable energy, Madhya Pradesh has become a power-surplus state. As a result 24/7 hours power is available.
Now Madhya Pradesh has topped the list of renewable energy producing states. The Rewa Ultra Mega Solar Power Plant with a capacity of 750 MW is Asia's largest single photovoltaic solar plant. World's largest floating solar project of 600 MW capacity is coming up in the backwaters of Omkareshwar Dam in Khandwa.
